

Project Proposal

For our project, we plan to join the ongoing effort to create a continual learning benchmark. We've had multiple conversations with Amogh, Tom, and Todd, giving us a good understanding of where we could meaningfully contribute.

Some considerations:

- Assisting Tom with pick and place task
- Assisting Amogh with benchmark infrastructure
- Adding new tasks to the benchmark

We are still in the process of finalizing our contributions, but we expect to have a more concrete plan by the end of the week.
